- Geology of Technology
- Dinosaur Discoveries
- Journey to the Ice Age
- Ancient Seas

Elementary Schoolers (5-10)

- Junior Dinosaurs
- Sea Creatures Through Time
- Ice Age Beasts
- The Time of the Dinosaurs

Camp Kits

Each virtual camp participant will receive a box of materials that go with planned activities and projects in the camp! These materials are the student's to keep. These items include things like books, USB microscopes and handlenses, rock samples, pinned insect specimens, art/craft supplies, casts of animal skulls and skeletons, and other unique resources relevant to each respective camp topic. Kits are sent in the mail in advance of camp starting.

Virtual Exploration Worlds

This summer, we are implementing a new set of video-game-like virtual exploration and learning spaces using a customizable online platform called GatherTown. This system allows for students and staff to engage in a setting outside of just Zoom, with interactivity for everyone involved. Here we have some previews here of our virtual field environments we're building. We're immensely excited about the new opportunities these resources will open up for us!

Join us March 27th or April 17th, when we will be having Exploration World open house events for the public from 11am to 2pm! To RSVP, email us at SternbergCamps@FHSU.edu.

Rainforest World

Flooded Cave Entrance

Flooded Cave Lake

Volcanic Island Shoreline

Volcanic Island Cave

Desert World

2020 high school campers presenting their respective research projects during a multi-camp "conference", complete with time for questions and keynote speakers. Here, 30 campers from three camps gathered to hear about each other's work and ask questions.
